

## PassagePoint™ Kiosk

A visitor self-registration kiosk that is optimized for busy lobbies with high traffic or unsupervised/unstaffed lobbies, using PassagePoint advanced technology.

The PassagePoint Kiosk guides visitors through the sign-in process, finding their host, scanning their driver license, business card, visitor e-pass or entering their name and company. Taking a picture is a snap with the built in camera then generating a professional visitor badge, all within seconds. PassagePoint's streamlined registration process can notify you the visitor has arrived, and ensure that the arriving visitor is not on a list of barred visitors.

PassagePoint's power and flexibility means you can tailor the registration process to meet your needs. Using the PassagePoint Kiosk at your entrance can help ensure that only the right visitors are allowed into your facility, improving guard productivity, service to your visitors and enhancing company image.
